*languages* : js • elm • rust • go • elixir • haskell • lisp

*software* : architecture • databases • systems

*design* : ux • writing • stories • video • music

## **Replenysh** • Lead Software Engineer • *January 2024*

Developed algorithms for optimizing recycling transportation logistics. Shipped multiple apps for iOS, Android, and web. Redesigned DB and led migrations.

## **Amicus AI** • Founding Engineer • *Jul 2023 - Dec 2023*

Shipped MVP with AI-powered PDF tools, document search (RAG), ingestion pipeline, interactive charts, etc.

## **Osmind** • Sr. Data Engineer • *Jan 2022 - Feb 2023*

Led multi-month initiative to migrate from unstructured DynamoDB to PostgreSQL. Spearheaded multiple data cleaning initiatives. Created infrastructure for DB migrations and testing. Discovered and fixed critical security vulnerabilities.

## **Pex** • Sr. Database Architect • *May 2019 - Jan 2022*

Administrator of 100TB PostgreSQL database (millions of rows updated each hour). Sole database architect for \$57M project (Attribution Engine).

## **CoinCircle** • Sr. Software Engineer • *Dec 2018 - May 2019*

Contributed to a cryptocurrency exchange platform. Migrated entire web-application from MongoDB to PostgreSQL/Redis. Overhauled fraud-prevention services and compliance checks. Improved security and authentication site-wide.

## **Product School** • Analytics Instructor • *Oct 2018 - Jan 2019*

Taught course on statistics, SQL, data mining, visualization, and ML.

## **PopChest** • Lead Software Engineer • *May 2018 - Oct 2018*

Developed a peer-to-peer video-distribution platform. Designed payment negotiation algorithms on top of BitTorrent. Built a browser-compatible cryptocurrency wallet. Implemented smart contracts.

## **Patch of Land** • Sr. Software Engineer • *Nov 2014 - Sep 2017*

Built systems that handled millions of dollars of transactions per month. Designed beautiful interfaces. Made a data warehouse. Created a business-rules editor for integrating information sources.

## **Walla Walla University** • CS & Math • *June 2014*

Double-majored in CS and mathematics. Contributed to research on hyperoperators, networking theory, and information flow in neural nets.
